

## **School Mission**

School mission consists in creation of the community of students, teachers and parents united by the idea of the personal growth of a human during joint activity. All associates are in the process of continuous education, teaching and improving each other.

The school community is perceived by us as a part of the world community.

The school sees its mission in the formation of the person thinking and careful, balanced and risking, principled and analyzing, socially responsible and tolerant, recognizing his/her own value of life and the value of other people's lives.

For personal realization and development, active citizenship, social inclusiveness and employment the school combines the national educational programs and the program of the International Baccalaureate focusing attention on the Key educational competences all our life:

- Interaction in the native language;
- Interaction in foreign languages;
- Mathematical literacy and the basic competences in the sphere of science and technology;
- Computer literacy;
- Development of learning skills;
- Social and civil competences;
- Feeling of innovation and business;
- Awareness and ability to express oneself in cultural sphere;
